PODCAST PLUS: A Redux-Inspired Podcast App with Dynamic Themes for Android

It is very interesting to hear the content going on podcast

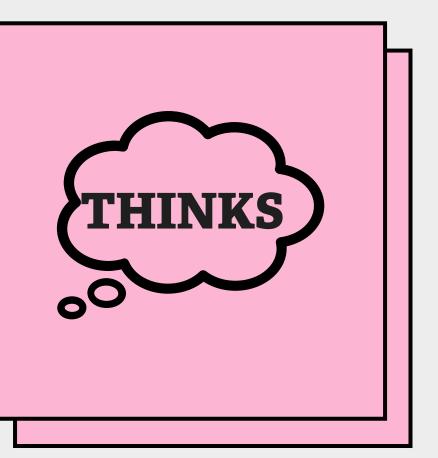

They can hear what they need at the current time

It is good to communicate with social media content creators

They can imagine what they listen

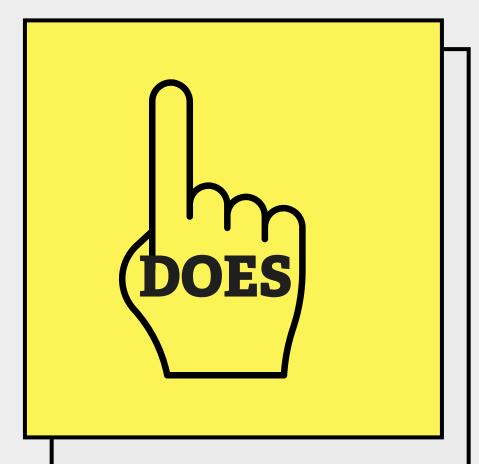

This app gives
various information
about various
events,places,historic
novels,politics,etc,..via
episode by episode..

If the content is much interesting, their mind will automatically urge to continuously hear the next episode

They can decide whether they want to hear or not and handle the options manually

FEELS

Frustrated about changing the episode, and Confused about "my lists"

They can decide when and where they want to hear according to their preference

Sometimes
they want
to comment
but that's
not possible

Sometimes they may feel themselves as a character in that episode...
